How Do You See Creation?

Thinking about the Bible, it's principals, and teachings. It is easy to see it for it's simplicity because life in the flesh has it's limitations that are based upon what is seen and manifested by senses.
The simplicity is simply love, but since it is extenuated by way of limitless experiences, that simplicity becomes inflated, creating confusion and misunderstanding.
Virtually nothing from what is unseen, from the spiritual world, from the flesh perspective, has been given much thought of, or credibility because it's unseen.
If you can not see it, feel it, smell it, taste it, the flesh mind thinks it does not exist.

The countless worlds and universes within His Creation have a basis of life, which is the Word; in whatever form it is presented within a souls understanding in that particular life. An understanding for the spirit-soul to bring life alive from within, and implement, or bring to life as experiences in whatever body the soul is encased in the progression of experiences in a souls eternity.
All life stems from His perfection unto all His spiritual souls that are created with those principles that are established by God because they are God himself, as He lives though His Creation. For God to experience the love that is experienced by the individual soul for his experience. Got it?
Life begins with thought. The individual consciousness within that soul, which is the consciousness of God, where each and every thought has the possibility of becoming what we understand as reality as our own as an individual. The thought only becoming reality by the senses. The thought may be reality for one, but does not exist for another, or is seen differently from another. Exactly why judgement is futile, and a soul through experiences virtually judge themselves because the inner self, your true self, can not be distorted, changed, or manipulated, and at some point, the truth is brought forward, understood, and experienced by the individual, as an individual.
True reality stops prior to the a conscious thought becoming manifested or expressed through the senses. This is why the Word states that a soul should live from his inner self, and not the outer self.
